

ENGR. BRANDO C. AGUILERA

Brief Profile

Engr. Brando C. Aguilera is a licensed civil engineer. Formerly the Project Management Officer V at the Bases Conversion and Development Authority (BCDA), he served as a senior officer of the institution for almost two decades. In May 2024, he assumed the role of Vice President for Operations and Business Development at Clark International Airport Corporation.

Throughout his career, he has successfully managed high-profile projects such as the Construction of the Airport to NCC Access Road Phase, the Airport to NCC Spur Access Road, 21 Units of ASEAN Villas, and the Subic-Clark-Tarlac Expressway Project (SCTEP).

He holds a Master's Degree in Civil Engineering from Holy Angel University and has completed executive training at Nanyang Technological University in Singapore.

As the Vice President for Operations and Business Development, he is actively involved in the corporation's seven flagship infrastructure projects aimed at transforming the 2,367 hectares of the Civil Aviation Complex into Clark Airport City, the premier global civil aviation logistics hub of the Philippines.
